

Adept Field Solutions Ltd. is an independent medical market research company. We are currently conducting a study across Europe and would like to extend an invitation to members of Nerve Tumours UK to participate and have your voices heard.

The purpose of the research is to help our sponsor, a pharmaceutical company, better understand how they can support people with **NF1 (neurofibromatosis type 1) and PN (plexiform neurofibromas)** and their caregivers. To achieve this, we would like to understand the journey yourself/the person you care for has been on in living with NF1 with PN; with the ultimate goal to help people like yourself/the person you care for in the future.

We would like to conduct a few interviews via video-call with parents/ caregivers, plus a few 'homework' exercises. Your total involvement will take approx. **90 minutes**.

You will receive a financial reward for your participation.

Any information you provide us with will be treated confidentially and will be completely anonymous.

Taking this opportunity to have your voice heard would greatly help us further our research, and your participation would be hugely appreciated. If you have any questions, please contact me, **Jason Seymour**, at Adept Field Solutions Ltd. by email Jason.seymour@adeptfield.com or call this number **0203 432 8217**.

More information about Adept Field Solutions can be found here: www.adeptfield.com

Many thanks in advance for your participation.
